LOWE SYNDROME TRUST – RESEARCH

Thank you for attending today's charity event.

We are delighted to announce that within the 18 months of forming, the Trust has raised just over £60,000. We have combined funding with the American Lowe Syndrome Association an amount of £11,000 and have received four excellent Lowe research proposals.

The following advertisement has just been placed in UK Medical Journals for the remaining funds raised of £50,000..

CALL FOR RESEARCH PROPOSAL IN LOWE SYNDROME

You are invited to apply for research funding from the Lowe Syndrome Trust. The genetic basis for Lowe Syndrome is caused by a defective gene that results in the deficiency of an enzyme OCRL1 Phosphatidylinositol 4,5-biphosphate, 5 phosphatase. Lowe's oculocerebrorenal syndrome is a disorder affecting the brain, eye and kidney. Research funds are available (£50,000 in the first instance) for funding a research studentship or assistant in understanding how the enzyme deficiency leads to malfunction in these specific organs. The closing date for Applications is 5th April 2002

For further information and Application Form, please contact Lorraine Thomas, Lowe Syndrome Trust, Telephone 0208 458 6791, Email : lthomas@lowetrust.com . Obtain the LST UK application form from www.lowetrust.com . See the LSA USA application form at <http://www.lowesyndrome.org/research/grantRFP2001.html> . VALENTINE BOARDS

There are two Valentine Boards situated either end of the conservatory. Each board contains donated items that can be purchased at discounted rates. All money raised will be added to the "funds for research" (please see inside for list).

SILENT BID

We have two "Silent Bid" items (on display). If you wish to include a bid, please complete the bid form which you will find on your table, and place in the box (next to the Prize Boards in the Conservatory). The highest bidder will be announced at the end of the evening.
