

# OSCAR HAS LOWE SYNDROME

## KEEPSAKE BRACELET £25

Having a baby with Lowe syndrome awakens us all to the fragility of our children's lives. The Lowe Syndrome Trust keepsake bracelet will not only raise funds to support medical research into Lowe Syndrome, but will also be a constant reminder of the disease and our need to find a cure.

Lowe Syndrome is caused by a missing enzyme which affects the brain, eyes, kidneys, bones and muscles. Sadly leading to a short life expectancy. Help us fight this disease by taking a bracelet for yourself and gifts for your family and friends.

The Lowe Syndrome Trust was founded by parents of a child diagnosed with Lowe Syndrome and is the only UK charity for the disease. The Trust receives no UK government support or funding.

"The Lowe Syndrome Trust will benefit by £10 for every bracelet sold. It is made of Swarovski crystals, pearls and sterling silver. The silver tag has the words "LST and care today, cure tomorrow" enscribed.
